Quarterly Considerations

Q2 2025

Disclosure

This report is intended for the exclusive use of clients or prospective clients (the “recipient”) of Fiducient Advisors and the information contained herein is confidential and the dissemination or distribution to any other person without the prior approval of Fiducient Advisors is strictly prohibited. Information has been obtained from sources believed to be reliable, though not independently verified. Any forecasts are hypothetical and represent future expectations and not actual return volatilities and correlations will differ from forecasts. This report does not represent a specific investment recommendation. The opinions and analysis expressed herein are based on Fiducient Advisor research and professional experience and are expressed as of the date of this report. Please consult with your advisor, attorney and accountant, as appropriate, regarding specific advice. Past performance does not indicate future performance and there is risk of loss.

Market Themes

Deficit Expected to Grow with “Big Beautiful Bill”

Tariffs and trade policy jump started the quarter, but fiscal policy came to the forefront as the Trump administration announced the “Big Beautiful Bill.” Concerns of a growing budget deficit contributed to higher yields on the long-end of the curve and added to overall volatility within the fixed income market. Lack of fiscal discipline contributed to Moody’s downgrade of the U.S., the last of the big three rating agencies to do so.

Source: CBO. As of June 2025.

Inflation Watch

Over the past decade, oil and the 10-year Treasury yield have been positively correlated. When crude rallies, yields tend to follow as higher oil prices are expected to bleed into headline inflation. The recent divergence has been driven by a slump in demand and increased supply by OPEC+ countries and may serve as an indicator to the potential future path of interest rates.

Please refer to Material Risk disclosure for important information associated with market volatility.

Market Themes

Diverging Central Bank Policy

The Federal Reserve held its policy rate steady during the quarter as it balances inflation and labor market data signals. However, while the U.S. has maintained rates, select regions around the globe have continued to ease rates, notably in the UK and Euro Area. This diverging policy has been one of the many factors contributing to U.S. dollar volatility this year and a tailwind for non-U.S. markets.

Source: FactSet. As of June 30, 2025.

When Uncertainty is High, Context is Grounding

Much has been made of recent U.S. dollar weakness and grumblings of the potential for the U.S. losing its reserve currency status. Similarly, with rising tensions in the Middle East, oil has been volatile adding to inflation concerns. At first glance investors may have concern, but with a bit of context that concern may abate. The U.S. dollar is still relatively strong, and oil is priced similarly to times when inflation is near 2.5 percent.

Asset Class Returns

Source: Morningstar Direct. As of June 30, 2025. *Hedge fund returns as of May 31, 2025.

Fixed Income (2Q 2025)

- + The Federal Reserve left rates unchanged at 4.25%–4.50% for a fourth consecutive meeting, in line with expectations, as policymakers take a cautious stance to fully evaluate the economic impact of President Trump's policies. Core bonds subsequently gained on falling rates.
- + Credit markets produced a positive return on persistently tight credit spreads. Resilient labor data and positive risk sentiment supported prices despite slowing growth. The U.S. dollar depreciated which benefitted non-USD bonds.

Equity (2Q 2025)

- + Equities gained on improved clarity around trade, and investor optimism about future policy support. Small caps lagged large, as investors favored large AI-related names.
- + Central bank activity in Europe also provided a boost to international developed markets.
- + Emerging markets outperformed developed markets during the period. A falling U.S. dollar and improved sentiment on a trade deal between the U.S. and China boosted returns.

Real Asset / Alternatives (2Q 2025)

- Equity REITs had a negative quarter, as investors rotated away from high valuation sectors such as residential.
- Commodities were negative for the quarter on falling energy, agriculture, and industrial metals.
- + Hedge Funds posted gains with equity hedge strategies outperforming.

See disclosures for list of indices representing each asset class. Past performance does not indicate future performance and there is a possibility of a loss. Indices cannot be invested in directly. Please refer to Material Risk disclosure for important information associated with market volatility.

Fixed Income Market Update

U.S. Treasury Yield Curve

The 2-year yield declined as markets increasingly priced in rate cuts in response to slowing economic growth and a softer-than-expected inflation backdrop. The yield curve remains inverted on the front-end highlighting investor concerns about slowing growth and ongoing uncertainty around trade and fiscal policy. The shift lower in yields reflected a defensive tone in rates markets as the Fed held steady and economic data show signs of slowing.

Source: FactSet. As of June 30, 2025.

Corporate Credit Spreads – Trailing 5 Years

Corporate credit spreads tightened over the quarter as investors responded to strong demand and resilient corporate fundamentals. Despite softer growth data, credit markets remained well-behaved with no signs of stress or disorderly repricing.

Source: FactSet. As of June 30, 2025.

See disclosures for list of indices representing each asset class. Past performance does not indicate future performance and there is a possibility of a loss. Indices cannot be invested in directly. Please refer to Material Risk disclosure for important information associated with market volatility.

Equity Market Update

U.S. Equities – Returns by Sector (2Q 2025)

U.S. equities advanced in the second quarter, led by technology, industrials, and communication services, as investors embraced pro-cyclical themes and AI-related momentum. Health care, energy, and staples lagged the broader market as investors rotated toward areas with higher earnings leverage. Sector leadership reflected a risk-on tone, even as macroeconomic signals remain mixed.

Market Capitalization, Style, and Select Country Performance (2Q 2025)

International equities posted strong gains in the second quarter as the U.S. dollar depreciated. Europe rallied on rate cuts and Japan rose on data suggesting economic resilience despite rising trade pressures. Emerging markets outperformed developed peers, driven by strength in South Korea and positive risk sentiment. Small caps and growth stocks mostly led global equity performance, while China, and India underperformed the broader EM index.

See disclosures for list of indices representing each asset class. Past performance does not indicate future performance and there is a possibility of a loss. Indices cannot be invested in directly. Please refer to Material Risk disclosure for important information associated with market volatility.

Real Assets Market Update

Commodity Performance (2Q 2025)

Commodities declined in the second quarter, with losses concentrated in energy, agriculture and industrial metals. Oil and natural gas fell amid easing Middle East tensions and tepid demand. Industrial metals such as copper fell on weak demand expectations. Precious metals like platinum and gold posted strong returns amid geopolitical tensions.

Source: Morningstar Direct. As of June 30, 2025.

REIT Sector Performance (2Q 2025)

REITs declined over the quarter, underperforming broader equity markets as investors favored higher-beta sectors and growth-sensitive assets. Office and lodging/resorts led performance among property types, benefiting from relative value interest and signs of demand stability. In contrast, single-family rental REITs, health care, and timber lagged, pressured by valuation concerns and sensitivity to macro headwinds.

Material Risks & Limitations

Fixed Income securities are subject to interest rate risks, the risk of default and liquidity risk. U.S. investors exposed to non-U.S. fixed income may also be subject to currency risk and fluctuations.

Cash may be subject to the loss of principal and over longer period of time may lose purchasing power due to inflation.

Domestic Equity can be volatile. The rise or fall in prices take place for a number of reasons including, but not limited to changes to underlying company conditions, sector or industry factors, or other macro events. These may happen quickly and unpredictably.

International Equity can be volatile. The rise or fall in prices take place for a number of reasons including, but not limited to changes to underlying company conditions, sector or industry impacts, or other macro events. These may happen quickly and unpredictably. International equity allocations may also be impacted by currency and/or country specific risks which may result in lower liquidity in some markets.

Real Assets can be volatile and may include asset segments that may have greater volatility than investment in traditional equity securities. Such volatility could be influenced by a myriad of factors including, but not limited to overall market volatility, changes in interest rates, political and regulatory developments, or other exogenous events like weather or natural disaster.

Private Equity involves higher risk and is suitable only for sophisticated investors. Along with traditional equity market risks, private equity investments are also subject to higher fees, lower liquidity and the potential for leverage that may amplify volatility and/or the potential loss of capital.

Private Credit involves higher risk and is suitable only for sophisticated investors. These assets are subject to interest rate risks, the risk of default and limited liquidity. U.S. investors exposed to non-U.S. private credit may also be subject to currency risk and fluctuations.

Private Real Estate involves higher risk and is suitable only for sophisticated investors. Real estate assets can be volatile and may include unique risks to the asset class like leverage and/or industry, sector or geographical concentration. Declines in real estate value may take place for a number of reasons including, but are not limited to economic conditions, change in condition of the underlying property or defaults by the borrower.

Marketable Alternatives involves higher risk and is suitable only for sophisticated investors. Along with traditional market risks, marketable alternatives are also subject to higher fees, lower liquidity and the potential for leverage that may amplify volatility or the potential for loss of capital. Additionally, short selling involved certain risks including, but not limited to additional costs, and the potential for unlimited loss on certain short sale positions.

All investing involves risk including the potential loss of principal. Market volatility may significantly impact the value of your investments. Recent tariff announcements may add to this volatility, creating additional economic uncertainty and potentially affecting the value of certain investments. Tariffs can impact various sectors differently, leading to changes in market dynamics and investment performance. You should consider these factors when making investment decisions. We recommend consulting with a qualified financial adviser to understand how these risks may affect your portfolio and to develop a strategy that aligns with your financial goals and risk tolerance.

Disclosures – Index & Benchmark Definitions

Index & Benchmark Definitions

Fixed Income

- **Bloomberg 1-3 Month U.S. Treasury Bill Index** is designed to measure the performance of public obligations of the U.S. Treasury that have a remaining maturity of greater than or equal to 1 month and less than 3 months.
- **Bloomberg U.S. Aggregate Index** covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities.
- **Bloomberg Global Aggregate ex. USD Indices** represent a broad-based measure of the global investment-grade fixed income markets. The two major components of this index are the Pan-European Aggregate and the Asian-Pacific Aggregate Indices. The index also includes Eurodollar and Euro-Yen corporate bonds and Canadian government, agency and corporate securities.
- **Bloomberg U.S. Corporate High Yield Index** covers the universe of fixed rate, non-investment grade debt. Eurobonds and debt issues from countries designated as emerging markets (sovereign rating of Baa1/BBB+/BBB+ and below using the middle of Moody's, S&P, and Fitch) are excluded, but Canadian and global bonds (SEC registered) of issuers in non-EMG countries are included.
- **Bloomberg US Government/Credit 1-3 Year Index** is the 1-3 year component of the U.S. Government/Credit Index, which includes securities in the Government and Credit Indices. The Government Index includes treasuries and agencies, while the credit index includes publicly issued U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity, and quality requirements.
- **Bloomberg US Government/Credit Long Index** is the Long component of the U.S. Government/Credit Index, which includes securities in the Government and Credit Indices. The Government Index includes treasuries and agencies, while the credit index includes publicly issued U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity and quality requirements.
- **Bloomberg US Treasury Inflation Protected Securities Index** consists of Inflation-Protection securities issued by the U.S. Treasury.
- **Bloomberg Muni Index** is a rules-based, market-value-weighted index engineered for the long-term tax-exempt bond market. Bonds must be rated investment-grade by at least two ratings agencies.
- **Bloomberg High Yield Municipal Bond Index** covers the universe of fixed rate, non-investment grade debt.
- **Bloomberg Intermediate U.S. Gov't/Credit** is the Intermediate component of the U.S. Government/Credit index, which includes securities in the Government and Credit Indices. The Government Index includes treasuries and agencies, while the credit index includes publicly issued U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity, and quality requirements.
- **JPMorgan GBI-EM Global Diversified** tracks the performance of local currency debt issued by emerging market governments, whose debt is accessible by most of the international investor base.

Equity

- **The S&P 500 Index** is a capitalization-weighted index designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.
- **Russell 3000 Value Index** measures the performance of those Russell 3000 companies with lower P/B ratios and lower forecasted growth values.

The small cap segment tends to capture more local economic and sector characteristics relative to larger Emerging Markets capitalization segments.
- **Ibbotson US Large Cap Stock Index** is comprised of the same components as the S&P 500 from 1957 to present. For years prior to 1957, the index has the same components as the S&P 90 (the S&P 90 was the original S&P index created in 1928 – it didn't start tracking 500 companies until 1957).

Alternatives & Miscellaneous

- **S&P Real Asset Index** is designed to measure global property, infrastructure, commodities, and inflation-linked bonds using liquid and investable component indices that track public equities, fixed income, and futures. In the index, equity holds 50% weight, commodities 10%, and fixed income 40%.
- **FTSE Nareit All Equity REITs Index** is a free-float adjusted, market capitalization-weighted index of U.S. equity REITs. Constituents of the index include all tax-qualified REITs with more than 50 percent of total assets in qualifying real estate assets other than mortgages secured by real property.
- **FTSE EPRA Nareit Developed Index** is designed to track the performance of listed real estate companies and REITs worldwide.
- **FTSE EPRA Nareit Developed ex US Index** is a subset of the FTSE EPRA Nareit Developed Index and is designed to track the performance of listed real estate companies and REITs in developed markets excluding the US.
- **Bloomberg Commodity Index** is calculated on an excess return basis and reflects commodity futures price movements. The index rebalances annually weighted 2/3 by trading volume and 1/3 by world production and weight-caps are applied at the commodity, sector and group level for diversification.
- **The Alerian MLP Index** is a float adjusted, capitalization-weighted index, whose constituents represent approximately 85% of total float-adjusted market capitalization, is disseminated real-time on a price-return basis (AMZ) and on a total-return basis.
- **HFR Asset Weighted Composite Index** is a global, asset-weighted index comprised of single-manager funds that report to HFR Database. Constituent funds report monthly net of all fees performance in US Dollar and have a minimum of \$50 Million under management or \$10 Million under management and a twelve (12) month track record of active performance. The HFR Asset Weighted Composite Index does not include Funds of Hedge Funds. The constituent funds of the HFR Asset Weighted Composite Index are weighted according to the AUM reported by each fund for the prior month.
- **HFR Fund of Funds Composite Index** is a global, equal-weighted index of all fund of hedge funds that report to the HFR Database. Constituent funds report monthly net of all fees performance in U.S. Dollars and have a minimum of \$50 million under management or a twelve (12) month track record of active performance.
- **HFR Equity Hedge Index** is an index of Investment Managers who maintain positions both long and short in primarily equity and equity derivative securities. Strategies can be broadly diversified or narrowly focused on specific sectors and can range broadly in terms of levels of net exposure, leverage employed, holding period, concentrations of market capitalizations and valuation ranges of typical portfolios. EH managers would typically maintain at least 50% exposure to, and may in some cases be entirely invested in, equities, both long and short. Constituent funds report monthly net of all fees performance in US Dollar and have a minimum of \$50 Million under management or \$10 Million under management and a twelve (12) month track record of active performance.

Disclosures – Index & Benchmark Definitions

- **HFRI Event Driven Index** is an index of Investment Managers who maintain positions in companies currently or prospectively involved in corporate transactions of a wide variety including but not limited to mergers, restructurings, financial distress, tender offers, shareholder buybacks, debt exchanges, security issuance or other capital structure adjustments. - **U.S. Dollar Index** measures the value of the dollar relative to a basket of U.S. trade partners' currencies. It is a weighted geometric mean of the dollar's value relative to other currencies.

Additional Information

- Equity sector returns are calculated by S&P, Russell, and MSCI for domestic and international markets, respectively. S&P and MSCI sector definitions correspond to the GICS® classification (Global Industry Classification System); Russell uses its own sector and industry classifications.
- MSCI country indices are free float-adjusted market capitalization indices that are designed to measure equity market performance of approximately 85% of the market capitalization in each specific country.
- Currency returns are calculated using FactSet's historical spot rates and are calculated using the U.S. dollar as the base currency.
