Quarterly Considerations

Q1 2026

Disclosure

This report is intended for the exclusive use of clients or prospective clients (the “recipient”) of Fiducient Advisors LLC, A Wealthspire Company, and the information contained herein is confidential and the dissemination or distribution to any other person without the prior approval of Fiducient Advisors, A Wealthspire Company, is strictly prohibited. Information has been obtained from sources believed to be reliable, though not independently verified. Any forecasts are hypothetical and represent future expectations and not actual return volatilities and correlations will differ from forecasts. This report does not represent a specific investment recommendation. The opinions and analysis expressed herein are based on Fiducient Advisors, A Wealthspire Company, research and professional experience and are expressed as of the date of this report. Please consult with your advisor, attorney and accountant, as appropriate, regarding specific advice. Past performance does not indicate future performance and there is risk of loss.

Market Themes

Historical Events and S&P 500 Total Return

Operation Epic Fury commenced at the end of February as the U.S. and Israel launched coordinated military strikes on Iran. Volatility spiked, particularly in commodity markets, and risk-off sentiment ensued. Historically, geopolitical events have resulted in initial volatility, while longer term, markets have generally fared well.

Source: Bloomberg Finance, L.P. As of March 31, 2026

Expected Change in Fed Funds Rate

Market expectations for Fed rate cuts shifted significantly in March from the start of the year, moving from pricing in roughly two cuts to zero cuts for 2026. Spiking commodity prices gave rise to concerns of inflation reigniting, conflicting with concerns of slowing growth and weakening labor market data, which typically put downward pressure on interest rates.

Please refer to Material Risk disclosure for important information associated with market volatility.

Market Themes

Software Under Pressure

Concerns of AI disruption within the software industry sent prices plummeting. The software industry's previous ~50% premium over the broader market has eroded over the past 5 months. This concern has also had negative impact within the private credit space, which has relatively large allocations to software. Many private credit funds are seeing large redemption requests from investors.

Source: FactSet. As of March 31, 2026.

U.S. Large Cap Lags Other Equity Segments

U.S. large cap equities came under pressure in the first quarter. Weakness in software and other Mag-7 names detracted from large cap. Diversification away from these high valuation areas of the market proved to be favorable for the quarter as investors favored smaller cap U.S. and non-U.S. investments which were more attractively valued.

Asset Class Returns

Source: Morningstar Direct. As of March 31, 2026. *Hedge fund returns as of February 28, 2026.

Fixed Income (1Q 2026)

+/- Fixed income markets had a mixed quarter to start the year. Positive results were reversed in March following the onset of the conflict with Iran. Interest rates spiked as inflation expectations rose.

- The high yield sector was not immune to the general risk-off sentiment and posted a modest decline in the quarter as credit spreads widened.
- Longer duration assets struggled in March as interest rates rose, offsetting positive momentum earlier in the year.

Equity (1Q 2026)

+/- It was a mixed quarter for U.S. equities as U.S. large cap underperformed small cap. Concerns that AI would disrupt the software industry was a drag on large cap names early on, and the conflict with Iran further sparked investors into a risk-off mentality.

+/- Developed international markets had a strong start to the year, but markets reversed course following the onset of the U.S./Iran conflict. Despite the pullback in March, non-U.S. markets outpaced U.S. large cap. Emerging markets outpaced developed, driven by strength in AI related hardware companies.

Real Asset / Alternatives (1Q 2026)

+ Equity REITs had a favorable quarter, outpacing the broader U.S. equity market. Data centers were a notable area of strength for the quarter.

- + Commodities rose over 20% during the quarter, driven from rising energy prices as the conflict in Iran disrupted global energy and commodity markets.
- + Real assets performed well during the quarter, driven by underlying commodity exposure, as well as global infrastructure related assets.

See disclosures for list of indices representing each asset class. Past performance does not indicate future performance and there is a possibility of a loss. Indices cannot be invested in directly. Please refer to Material Risk disclosure for important information associated with market volatility.

Fixed Income Market Update

U.S. Treasury Yield Curve

The Federal Reserve held its target rate steady during the quarter, but interest rates moved higher across the curve. Concerns of rising inflation stemming from spiking commodity prices were a primary driver and investor expectations for rate cuts in 2026 dissipated.

Source: FactSet. As of March 31, 2026.

Corporate Credit Spreads – Trailing 5 Years

Risk-off sentiment spilled into the corporate credit market as both investment grade and high yield spreads moved higher during the quarter. Growing concerns of weaker growth helped fuel the move. Despite the increase, spread levels remain below longer-term averages.

Source: FactSet. As of March 31, 2026.

See disclosures for list of indices representing each asset class. Past performance does not indicate future performance and there is a possibility of a loss. Indices cannot be invested in directly. Please refer to Material Risk disclosure for important information associated with market volatility.

Equity Market Update

U.S. Equities – Returns by Sector (1Q 2026)

U.S. large cap equities experienced a negative first quarter, but underlying sector performance was mixed. Growing concerns about the impact of AI, particularly within the software sector, was a key detractor. Shares of Oracle and Salesforce were down over 20% each during the period, while “asset heavy” sectors such as utilities, materials and industrials performed well. Energy was the standout in the quarter as commodity prices spiked and oil moved to over \$100 per barrel following the close of the Strait of Hormuz.

Market Capitalization, Style, and Select Country Performance (1Q 2026)

Regional equity markets saw mixed results during the first quarter. U.S. small cap produced a modest positive return while U.S. large cap and non-U.S. markets declined. Abroad, markets started the year strong, but reversed course as the U.S./Iran conflict escalated. Despite the re-rating in March, non-U.S. equities generally outperformed U.S. equities. A rotation out of more expensive growth-oriented segments of the market helped value stocks lead the way for the quarter.

Please refer to Material Risk disclosure for important information associated with market volatility.

Real Assets Market Update

Commodity Performance (1Q 2026)

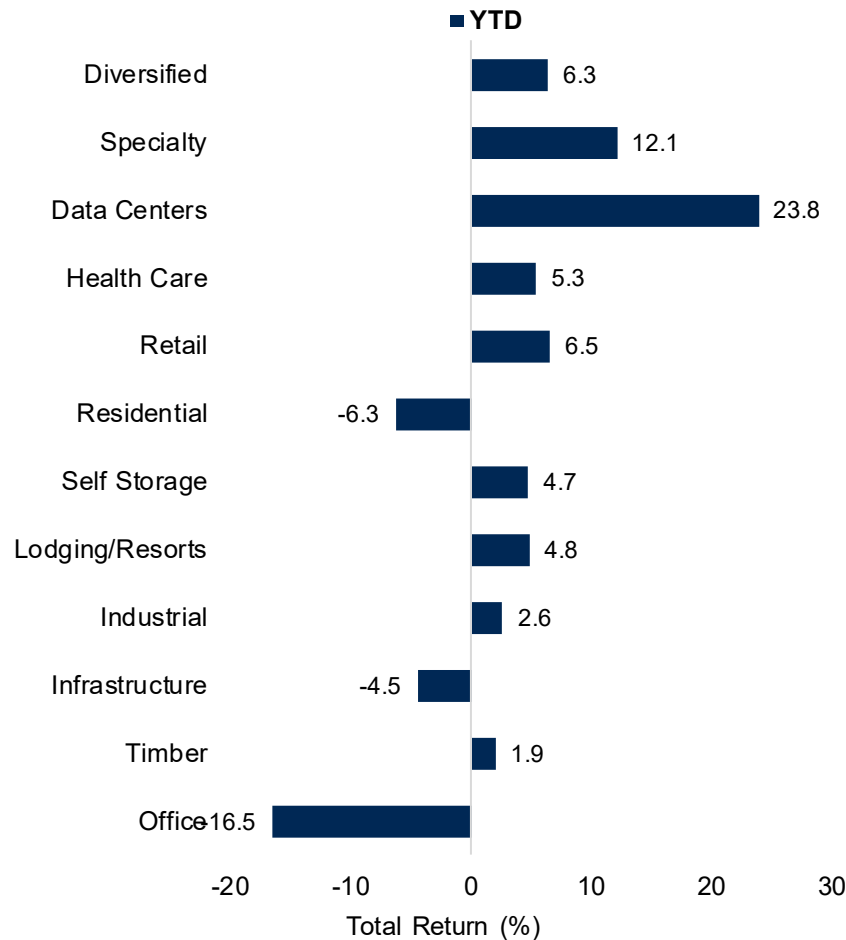

Commodities advanced during the quarter, with all major sub-sectors posting gains. Energy prices rose sharply amid the conflict involving Iran and the closure of the Strait of Hormuz, a critical chokepoint through which roughly 20% of global oil and liquefied natural gas supply flows.

Source: Morningstar Direct. As of March 31, 2026.

REIT Sector Performance (1Q 2026)

REITs rose during the first quarter and outperformed broader equities amid heightened macro and geopolitical volatility, with most sub-sectors producing a positive return. Data centers led the way in the period supported by robust hyperscaler demand tied to AI and cloud expansion.

Material Risks & Limitations

Fixed Income securities are subject to interest rate risks, the risk of default and liquidity risk. U.S. investors exposed to non-U.S. fixed income may also be subject to currency risk and fluctuations.

Cash may be subject to the loss of principal and over longer period of time may lose purchasing power due to inflation.

Domestic Equity can be volatile. The rise or fall in prices take place for a number of reasons including, but not limited to changes to underlying company conditions, sector or industry factors, or other macro events. These may happen quickly and unpredictably.

International Equity can be volatile. The rise or fall in prices take place for a number of reasons including, but not limited to changes to underlying company conditions, sector or industry impacts, or other macro events. These may happen quickly and unpredictably. International equity allocations may also be impacted by currency and/or country specific risks which may result in lower liquidity in some markets.

Real Assets can be volatile and may include asset segments that may have greater volatility than investment in traditional equity securities. Such volatility could be influenced by a myriad of factors including, but not limited to overall market volatility, changes in interest rates, political and regulatory developments, or other exogenous events like weather or natural disaster.

Private Equity involves higher risk and is suitable only for sophisticated investors. Along with traditional equity market risks, private equity investments are also subject to higher fees, lower liquidity and the potential for leverage that may amplify volatility and/or the potential loss of capital.

Private Credit involves higher risk and is suitable only for sophisticated investors. These assets are subject to interest rate risks, the risk of default and limited liquidity. U.S. investors exposed to non-U.S. private credit may also be subject to currency risk and fluctuations.

Private Real Estate involves higher risk and is suitable only for sophisticated investors. Real estate assets can be volatile and may include unique risks to the asset class like leverage and/or industry, sector or geographical concentration. Declines in real estate value may take place for a number of reasons including, but are not limited to economic conditions, change in condition of the underlying property or defaults by the borrower.

Marketable Alternatives involves higher risk and is suitable only for sophisticated investors. Along with traditional market risks, marketable alternatives are also subject to higher fees, lower liquidity and the potential for leverage that may amplify volatility or the potential for loss of capital. Additionally, short selling involved certain risks including, but not limited to additional costs, and the potential for unlimited loss on certain short sale positions.

All investing involves risk including the potential loss of principal. Market volatility may significantly impact the value of your investments. Recent tariff announcements may add to this volatility, creating additional economic uncertainty and potentially affecting the value of certain investments. Tariffs can impact various sectors differently, leading to changes in market dynamics and investment performance. You should consider these factors when making investment decisions. We recommend consulting with a qualified financial adviser to understand how these risks may affect your portfolio and to develop a strategy that aligns with your financial goals and risk tolerance.

Disclosures – Index & Benchmark Definitions

Index & Benchmark Definitions

Fixed Income

- **Bloomberg 1-3 Month U.S. Treasury Bill Index** is designed to measure the performance of public obligations of the U.S. Treasury that have a remaining maturity of greater than or equal to 1 month and less than 3 months.
- **Bloomberg U.S. Aggregate Index** covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities.
- **Bloomberg Global Aggregate ex. USD Indices** represent a broad-based measure of the global investment-grade fixed income markets. The two major components of this index are the Pan-European Aggregate and the Asian-Pacific Aggregate Indices. The index also includes Eurodollar and Euro-Yen corporate bonds and Canadian government, agency and corporate securities.
- **Bloomberg U.S. Corporate High Yield Index** covers the universe of fixed rate, non-investment grade debt. Eurobonds and debt issues from countries designated as emerging markets (sovereign rating of Baa1/BBB+/BBB+ and below using the middle of Moody's, S&P, and Fitch) are excluded, but Canadian and global bonds (SEC registered) of issuers in non-EMG countries are included.
- **Bloomberg US Government/Credit 1-3 Year Index** is the 1-3 year component of the U.S. Government/Credit Index, which includes securities in the Government and Credit Indices. The Government Index includes treasuries and agencies, while the credit index includes publicly issued U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity, and quality requirements.
- **Bloomberg US Government/Credit Long Index** is the Long component of the U.S. Government/Credit Index, which includes securities in the Government and Credit Indices. The Government Index includes treasuries and agencies, while the credit index includes publicly issued U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity and quality requirements.
- **Bloomberg US Treasury Inflation Protected Securities Index** consists of Inflation-Protection securities issued by the U.S. Treasury.
- **Bloomberg Muni Index** is a rules-based, market-value-weighted index engineered for the long-term tax-exempt bond market. Bonds must be rated investment-grade by at least two ratings agencies.
- **Bloomberg High Yield Municipal Bond Index** covers the universe of fixed rate, non-investment grade debt.
- **Bloomberg Intermediate U.S. Gov't/Credit** is the Intermediate component of the U.S. Government/Credit index, which includes securities in the Government and Credit Indices. The Government Index includes treasuries and agencies, while the credit index includes publicly issued U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity, and quality requirements.
- **JPMorgan GBI-EM Global Diversified** tracks the performance of local currency debt issued by emerging market governments, whose debt is accessible by most of the international investor base.

Equity

- **The S&P 500 Index** is a capitalization-weighted index designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.
- **Russell 3000 Value Index** measures the performance of those Russell 3000 companies with lower P/B ratios and lower forecasted growth values.

The small cap segment tends to capture more local economic and sector characteristics relative to larger Emerging Markets capitalization segments.
- **Ibbotson US Large Cap Stock Index** is comprised of the same components as the S&P 500 from 1957 to present. For years prior to 1957, the index has the same components as the S&P 90 (the S&P 90 was the original S&P index created in 1928 – it didn't start tracking 500 companies until 1957).

Alternatives & Miscellaneous

- **S&P Real Asset Index** is designed to measure global property, infrastructure, commodities, and inflation-linked bonds using liquid and investable component indices that track public equities, fixed income, and futures. In the index, equity holds 50% weight, commodities 10%, and fixed income 40%.
- **FTSE Nareit All Equity REITs Index** is a free-float adjusted, market capitalization-weighted index of U.S. equity REITs. Constituents of the index include all tax-qualified REITs with more than 50 percent of total assets in qualifying real estate assets other than mortgages secured by real property.
- **FTSE EPRA Nareit Developed Index** is designed to track the performance of listed real estate companies and REITs worldwide.
- **FTSE EPRA Nareit Developed ex US Index** is a subset of the FTSE EPRA Nareit Developed Index and is designed to track the performance of listed real estate companies and REITs in developed markets excluding the US.
- **Bloomberg Commodity Index** is calculated on an excess return basis and reflects commodity futures price movements. The index rebalances annually weighted 2/3 by trading volume and 1/3 by world production and weight-caps are applied at the commodity, sector and group level for diversification.
- **The Alerian MLP Index** is a float adjusted, capitalization-weighted index, whose constituents represent approximately 85% of total float-adjusted market capitalization, is disseminated real-time on a price-return basis (AMZ) and on a total-return basis.
- **HFRI Asset Weighted Composite Index** is a global, asset-weighted index comprised of single-manager funds that report to HFR Database. Constituent funds report monthly net of all fees performance in US Dollar and have a minimum of \$50 Million under management or \$10 Million under management and a twelve (12) month track record of active performance. The HFRI Asset Weighted Composite Index does not include Funds of Hedge Funds. The constituent funds of the HFRI Asset Weighted Composite Index are weighted according to the AUM reported by each fund for the prior month.
- **HFRI Fund of Funds Composite Index** is a global, equal-weighted index of all fund of hedge funds that report to the HFR Database. Constituent funds report monthly net of all fees performance in U.S. Dollars and have a minimum of \$50 million under management or a twelve (12) month track record of active performance.
- **HFRI Equity Hedge Index** is an index of Investment Managers who maintain positions both long and short in primarily equity and equity derivative securities. Strategies can be broadly diversified or narrowly focused on specific sectors and can range broadly in terms of levels of net exposure, leverage employed, holding period, concentrations of market capitalizations and valuation ranges of typical portfolios. EH managers would typically maintain at least 50% exposure to, and may in some cases be entirely invested in, equities, both long and short. Constituent funds report monthly net of all fees performance in US Dollar and have a minimum of \$50 Million under management or \$10 Million under management and a twelve (12) month track record of active performance.

Disclosures – Index & Benchmark Definitions

- **HFRI Event Driven Index** is an index of Investment Managers who maintain positions in companies currently or prospectively involved in corporate transactions of a wide variety including but not limited to mergers, restructurings, financial distress, tender offers, shareholder buybacks, debt exchanges, security issuance or other capital structure adjustments. Constituent funds report monthly net of all fees performance in US Dollar and have a minimum of \$50 Million under management or \$10 Million under management and a twelve (12) month track record of active performance
- **HFRI Macro Index** is an index of investment Managers which trade a broad range of strategies in which the investment process is predicated on movements in underlying economic variables and the impact these have on equity, fixed income, hard currency and commodity markets. Managers employ a variety of techniques, both discretionary and systematic analysis, combinations of top down and bottom up theses, quantitative and fundamental approaches and long and short term holding periods. Constituent funds report monthly net of all fees performance in US Dollar and have a minimum of \$50 Million under management or \$10 Million under management and a twelve (12) month track record of active performance.
- **HFRI Relative Value Index** is an index of Investment Managers who maintain positions in which the investment thesis is predicated on realization of a valuation discrepancy in the relationship between multiple securities. Managers employ a variety of fundamental and quantitative techniques to establish investment theses, and security types range broadly across equity, fixed income, derivative or other security types. Constituent funds report monthly net of all fees performance in US Dollar and have a minimum of \$50 Million under management or \$10 Million under management and a twelve (12) month track record of active performance.

- **U.S. Dollar Index** measures the value of the dollar relative to a basket of U.S. trade partners' currencies. It is a weighted geometric mean of the dollar's value relative to other currencies.

Additional Information

- Equity sector returns are calculated by S&P, Russell, and MSCI for domestic and international markets, respectively. S&P and MSCI sector definitions correspond to the GICS® classification (Global Industry Classification System); Russell uses its own sector and industry classifications.
- MSCI country indices are free float-adjusted market capitalization indices that are designed to measure equity market performance of approximately 85% of the market capitalization in each specific country.
- Currency returns are calculated using FactSet's historical spot rates and are calculated using the U.S. dollar as the base currency.
