Market Themes

Strong Earnings Backdrop

Equity markets have generated strong returns year-to-date. While valuations remain above long-term averages, a favorable earnings backdrop helps support the price move higher. Earnings grew almost 30% year-over-year in Q1 and expectations remain high for strong growth for the remainder of 2026. However, we are mindful of concentration within markets which, when combined with elevated valuations, leaves less margin for disappointment.

Source: FactSet Earnings Insight, As of June 26, 2026. Estimates for Q2-Q4 2026.

U.S. Economic Picture Remains Favorable

The U.S. economy has remained remarkably resilient in the face of geopolitical tensions and commodity market volatility. The macro backdrop has been supported by healthy consumer spending, a labor market that appears to be solidifying, strong corporate fundamentals, and an ongoing wave of investment tied to artificial intelligence infrastructure. While inflation remains above the Federal Reserve's long-term target, economic growth expectations held firm and recession concerns faded.

Source: FactSet. As of June 30, 2026

Market Themes

Oil Prices and Inflation Expectations Year-to-Date

Tensions in the Middle East and the evolving dynamic of the conflict between the U.S. and Iran has created extreme volatility in commodity markets. Shifting commodity prices have fueled a jump in recent inflation prints, but market expectations for inflation have been volatile as well. The Fed has remained on hold, but minutes have revealed a more hawkish tone from the most recent meeting, new chair Warsh's first meeting leading the FOMC.

Source: FactSet. As of June 30, 2026

IPO Craze

The quarter was filled with much news and anticipation for the mega-cap IPO of SpaceX. Despite the initial raise and extreme market cap, the low float available to the market resulted in relatively low exposure within market indexes where it was included. Due to this, SpaceX ranked 51st within the Russell 1000 Index at the end of the quarter, a weight of roughly 0.2% despite being the 6th largest company by full market cap. More float will become available as lock-ups expire, but initial impact for these mega-IPOs on market indexes is likely to be small.

Russell 1000 Index Top 10 Constituents	Index Rank	Index Weight	Market Cap (\$M)
NVIDIA Corp	1	6.7%	\$4,842,178
Apple Inc	2	6.0%	\$4,249,933
Alphabet Inc	3	5.4%	\$4,318,356
Microsoft Corp	4	4.0%	\$2,770,955
Amazon.com Inc	5	3.3%	\$2,563,849
Broadcom Inc	6	2.5%	\$1,797,176
Micron Technology Inc	7	1.9%	\$1,303,647
Meta Platforms Inc	8	1.8%	\$1,429,868
Tesla Inc	9	1.8%	\$1,579,657
Eli Lilly and Co	10	1.4%	\$1,129,553
SpaceX	51	0.2%	\$2,266,821

Asset Class Returns

Source: Morningstar Direct. As of June 30, 2026. *Hedge fund returns as of May 31, 2026.

Fixed Income (2Q 2026)

- + Fixed income markets had a positive quarter despite a rise in interest rates and a complicated backdrop for the asset class as investors digested elevated inflation, a resilient economy and solid labor market. Core bonds had a modest positive return, benefiting from strength in the corporate bond market.
- + High yield bonds were the standout within fixed income during the quarter with strong investor demand in the risk-on market.
- + Longer duration assets fared well even in the face of modestly higher rates on the long-end of the curve.

Equity (2Q 2026)

- + Investors looked through a volatile macro backdrop and rewarded signs of resilient earnings, easing geopolitical stress and continued demand tied to artificial intelligence infrastructure. There was broadening market leadership with U.S. small cap outpacing large cap as investors grew more comfortable with the economic backdrop.
- + Non-U.S. markets also saw strong results, with emerging markets leading the way, jumping over 24% in the quarter. Semiconductor and other AI-related technology companies were the main source of strength for the asset class.

Real Asset / Alternatives (2Q 2026)

- + Equity REITs had a positive quarter, benefiting from the risk on market as well as improving sentiment and fundamentals in areas such as office and lodging.
- + Hedge funds, reported on a month lag, generated strong results this year amidst the market volatility. Event driven strategies were among the best over the trailing three months.
- Commodities, while positive year-to-date, sold off in the second quarter. Easing tensions in the Middle East pushed energy prices lower and precious metals gave back gains from earlier in the year as well.

See disclosures for list of indices representing each asset class. Past performance does not indicate future performance and there is a possibility of a loss. Indices cannot be invested in directly. Please refer to Material Risk disclosure for important information associated with market volatility.

Fixed Income Market Update

U.S. Treasury Yield Curve

It was a volatile period for interest rates as markets digested shifting inflation expectations tied predominately to swinging energy prices. Ultimately interest rates rose as market expectations shifted from pricing in rate cuts to pricing in a rate hike by the end of the 2026.

Source: FactSet. As of June 30, 2026.

Corporate Credit Spreads – Trailing 5 Years

The corporate bond market continues to garner demand and benefited from the risk-on environment in the second quarter. Credit spreads compressed from the start of the period and while all-in yields remain attractive, the compensation above Treasuries hovers near 20-year tight.

Equity Market Update

U.S. Equities – Returns by Sector (2Q 2026)

The S&P 500 rose over 15% during the second quarter with positive results across almost all underlying sectors. A strong fundamental backdrop helped support the rally, with the sixth quarter in a row of double-digit year-over-year earnings growth (Q1 results released in Q2). The information technology sector led the way as the AI theme remained dominant for most of the quarter, before reversing some in June. A handful of companies related to semiconductors gained over 200%, including Micron Technology and Intel.

Market Capitalization, Style, and Select Country Performance (2Q 2026)

Equity markets saw a strong rebound in the second quarter. The AI dominated quarter in the U.S. was also experienced abroad, and growth stocks across the board outpaced their value counterparts. Emerging markets was dominated by South Korea and Taiwan, which account for over 40% of the index combined. The rally was closely tied to the global AI supply chain, particularly in Asia, where semiconductor and technology-heavy markets benefited from the same hardware cycle that lifted U.S. chipmakers.

See disclosures for list of indices representing each asset class. Past performance does not indicate future performance and there is a possibility of a loss. Indices cannot be invested in directly. Please refer to Material Risk disclosure for important information associated with market volatility.

Real Assets Market Update

Commodity Performance (2Q 2026)

Commodities declined during the second quarter as weakness across energy and precious metals more than offset gains in select industrial metals. Energy markets were pressured by easing geopolitical concerns and improving supply expectations, while precious metals weakened on increased expectations of a Fed rate hike in the back half of the year.

See disclosures for list of indices representing each asset class. Past performance does not indicate future performance and there is a possibility of a loss. Indices cannot be invested in directly. Please refer to Material Risk disclosure for important information associated with market volatility.

REIT Sector Performance (2Q 2026)

REITs advanced during the second quarter, supported by strong operating fundamentals and improving investor sentiment. Lodging and office sectors led performance as travel demand remained strong and investors became increasingly constructive on office fundamentals given strong leasing activity. Long-duration infrastructure REITs lagged as capital rotated from the rate sensitive subsector.

Material Risks & Limitations

Fixed Income securities are subject to interest rate risks, the risk of default and liquidity risk. U.S. investors exposed to non-U.S. fixed income may also be subject to currency risk and fluctuations.

Cash may be subject to the loss of principal and over longer period of time may lose purchasing power due to inflation.

Domestic Equity can be volatile. The rise or fall in prices take place for a number of reasons including, but not limited to changes to underlying company conditions, sector or industry factors, or other macro events. These may happen quickly and unpredictably.

International Equity can be volatile. The rise or fall in prices take place for a number of reasons including, but not limited to changes to underlying company conditions, sector or industry impacts, or other macro events. These may happen quickly and unpredictably. International equity allocations may also be impacted by currency and/or country specific risks which may result in lower liquidity in some markets.

Real Assets can be volatile and may include asset segments that may have greater volatility than investment in traditional equity securities. Such volatility could be influenced by a myriad of factors including, but not limited to overall market volatility, changes in interest rates, political and regulatory developments, or other exogenous events like weather or natural disaster.

Private Equity involves higher risk and is suitable only for sophisticated investors. Along with traditional equity market risks, private equity investments are also subject to higher fees, lower liquidity and the potential for leverage that may amplify volatility and/or the potential loss of capital.

Private Credit involves higher risk and is suitable only for sophisticated investors. These assets are subject to interest rate risks, the risk of default and limited liquidity. U.S. investors exposed to non-U.S. private credit may also be subject to currency risk and fluctuations.

Private Real Estate involves higher risk and is suitable only for sophisticated investors. Real estate assets can be volatile and may include unique risks to the asset class like leverage and/or industry, sector or geographical concentration. Declines in real estate value may take place for a number of reasons including, but are not limited to economic conditions, change in condition of the underlying property or defaults by the borrower.

Marketable Alternatives involves higher risk and is suitable only for sophisticated investors. Along with traditional market risks, marketable alternatives are also subject to higher fees, lower liquidity and the potential for leverage that may amplify volatility or the potential for loss of capital. Additionally, short selling involved certain risks including, but not limited to additional costs, and the potential for unlimited loss on certain short sale positions.

All investing involves risk including the potential loss of principal. Market volatility may significantly impact the value of your investments. Recent tariff announcements may add to this volatility, creating additional economic uncertainty and potentially affecting the value of certain investments. Tariffs can impact various sectors differently, leading to changes in market dynamics and investment performance. You should consider these factors when making investment decisions. We recommend consulting with a qualified financial adviser to understand how these risks may affect your portfolio and to develop a strategy that aligns with your financial goals and risk tolerance.

Fixed Income

- **Bloomberg 1-3 Month U.S. Treasury Bill Index** is designed to measure the performance of public obligations of the U.S. Treasury that have a remaining maturity of greater than or equal to 1 month and less than 3 months.
- **Bloomberg U.S. Aggregate Index** covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities.
- **Bloomberg Global Aggregate ex. USD Indices** represent a broad-based measure of the global investment-grade fixed income markets. The two major components of this index are the Pan-European Aggregate and the Asian-Pacific Aggregate Indices. The index also includes Eurodollar and Euro-Yen corporate bonds and Canadian government, agency and corporate securities.
- **Bloomberg U.S. Corporate High Yield Index** covers the universe of fixed rate, non-investment grade debt. Eurobonds and debt issues from countries designated as emerging markets (sovereign rating of Baa1/BBB+/BBB+ and below using the middle of Moody's, S&P, and Fitch) are excluded, but Canadian and global bonds (SEC registered) of issuers in non-EMG countries are included.
- **Bloomberg US Government/Credit 1-3 Year Index** is the 1-3 year component of the U.S. Government/Credit Index, which includes securities in the Government and Credit Indices. The Government Index includes treasuries and agencies, while the credit index includes publicly issued U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity, and quality requirements.
- **Bloomberg US Government/Credit Long Index** is the Long component of the U.S. Government/Credit Index, which includes securities in the Government and Credit Indices. The Government Index includes treasuries and agencies, while the credit index includes publicly issued U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity and quality requirements.
- **Bloomberg US Treasury Inflation Protected Securities Index** consists of Inflation-Protection securities issued by the U.S. Treasury.
- **Bloomberg Muni Index** is a rules-based, market-value-weighted index engineered for the long-term tax-exempt bond market. Bonds must be rated investment-grade by at least two ratings agencies.
- **Bloomberg High Yield Municipal Bond Index** covers the universe of fixed rate, non-investment grade debt.
- **Bloomberg Intermediate U.S. Gov't/Credit** is the Intermediate component of the U.S. Government/Credit index, which includes securities in the Government and Credit Indices. The Government Index includes treasuries and agencies, while the credit index includes publicly issued U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity, and quality requirements.
- **JPMorgan GBI-EM Global Diversified** tracks the performance of local currency debt issued by emerging market governments, whose debt is accessible by most of the international investor base.

Equity

- **The S&P 500 Index** is a capitalization-weighted index designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.
- **Russell 3000 Value Index** measures the performance of those Russell 3000 companies with lower P/B ratios and lower forecasted growth values.
- **Russell 3000 Index** is a market-cap-weighted index which consists of roughly 3,000 of the largest companies in the U.S. as determined by market capitalization. It represents nearly 98% of the investable U.S. equity market.
- **Russell 3000 Growth Index** measures the performance of those Russell 3000 companies with higher P/B ratios and higher forecasted growth values.
- **Russell 1000 Value Index** measures the performance of those Russell 1000 companies with lower P/B ratios and lower forecasted growth values.
- **Russell 1000 Index** consists of the largest 1000 companies in the Russell 3000 Index.
- **Russell 1000 Growth Index** measures the performance of those Russell 1000 companies with higher P/B ratios and higher forecasted growth values.
- **Russell Mid Cap Value Index** measures the performance of those Russell Mid Cap companies with lower P/B ratios and lower forecasted growth values.
- **Russell Mid Cap Index** measures the performance of the 800 smallest companies in the Russell 1000 Index.
- **Russell Mid Cap Growth Index** measures the performance of those Russell Mid Cap companies with higher P/B ratios and higher forecasted growth values.
- **Russell 2000 Value Index** measures the performance of those Russell 2000 companies with lower P/B ratios and lower forecasted growth values.
- **Russell 2000** consists of the 2,000 smallest U.S. companies in the Russell 3000 index.
- **Russell 2000 Growth Index** measures the performance of the Russell 2000 companies with higher P/B ratios and higher forecasted growth values.
- **MSCI ACWI (All Country World Index) ex. U.S. Index** captures large and mid-cap representation across Developed Markets countries (excluding the United States) and Emerging Markets countries. The index covers approximately 85% of the global equity opportunity set outside the U.S.
- **MSCI ACWI Index** captures large and mid cap representation across Developed Markets and Emerging Markets countries. The index covers approximately 85% of the global investable opportunity set.
- **MSCI EAFE IMI Index** is an equity index which captures large, mid and small cap representation across Developed Markets countries around the world, excluding the U.S. and Canada. The index covers approximately 99% of the free float-adjusted market capitalization in each country.
- **MSCI EAFE Value Index** captures large and mid cap securities exhibiting overall value style characteristics across Developed Markets countries around the world, excluding the US and Canada. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield.
- **MSCI EAFE Index** is an equity index which captures large and mid-cap representation across Developed Markets countries around the world, excluding the U.S. and Canada. The index covers approximately 85% of the free float-adjusted market capitalization in each country.

Disclosures – Index & Benchmark Definitions

- **MSCI EAFE Growth Index** captures large and mid cap securities exhibiting overall growth style characteristics across Developed Markets countries around the world, excluding the US and Canada. The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend.
- **MSCI EAFE Large Cap Index** is an equity index which captures large cap representation across Developed Markets countries around the world, excluding the US and Canada. The index covers approximately 70% of the free-float adjusted market capitalization in each country.

The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield.
- **MSCI Emerging Markets Index** captures large and mid-cap representation across Emerging Markets countries. The index covers approximately 85% of the free-float adjusted market capitalization in each country.
- **MSCI Emerging Markets Growth Index** captures large and mid-cap representation across Emerging Markets countries. The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend.
- **MSCI Emerging Markets Index** captures large and mid-cap representation across Emerging Markets countries. The index covers approximately 85% of the free-float adjusted market capitalization in each country.
- **MSCI Emerging Markets (EM) Small Cap Index** includes small cap representation across Emerging Markets countries. The index covers approximately 14% of the free float-adjusted market capitalization in each country. The small cap segment tends to capture more local economic and sector characteristics relative to larger Emerging Markets capitalization segments.
- **Ibbotson US Large Cap Stock Index** is comprised of the same components as the S&P 500 from 1957 to present. For years prior to 1957, the index has the same components as the S&P 90 (the S&P 90 was the original S&P index created in 1928 – it didn't start tracking 500 companies until 1957).

Alternatives & Miscellaneous

- **S&P Real Asset Index** is designed to measure global property, infrastructure, commodities, and inflation-linked bonds using liquid and investable component indices that track public equities, fixed income, and futures. In the index, equity holds 50% weight, commodities 10%, and fixed income 40%.
- **FTSE Nareit All Equity REITs Index** is a free-float adjusted, market capitalization-weighted index of U.S. equity REITs. Constituents of the index include all tax-qualified REITs with more than 50 percent of total assets in qualifying real estate assets other than mortgages secured by real property.
- **FTSE EPRA Nareit Developed Index** is designed to track the performance of listed real estate companies and REITs worldwide.
- **FTSE EPRA Nareit Developed ex US Index** is a subset of the FTSE EPRA Nareit Developed Index and is designed to track the performance of listed real estate companies and REITs in developed markets excluding the US.
- **Bloomberg Commodity Index** is calculated on an excess return basis and reflects commodity futures price movements. The index rebalances annually weighted 2/3 by trading volume and 1/3 by world production and weight-caps are applied at the commodity, sector and group level for diversification.
- **The Alerian MLP Index** is a float adjusted, capitalization-weighted index, whose constituents represent approximately 85% of total float-adjusted market capitalization, is disseminated real-time on a price-return basis (AMZ) and on a total-return basis.
- **HFR Asset Weighted Composite Index** is a global, asset-weighted index comprised of single-manager funds that report to HFR Database. Constituent funds report monthly net of all fees performance in US Dollar and have a minimum of \$50 Million under management or \$10 Million under management and a twelve (12) month track record of active performance. The HFR Asset Weighted Composite Index does not include Funds of Hedge Funds. The constituent funds of the HFR Asset Weighted Composite Index are weighted according to the AUM reported by each fund for the prior month.
- **HFR Fund of Funds Composite Index** is a global, equal-weighted index of all fund of hedge funds that report to the HFR Database. Constituent funds report monthly net of all fees performance in U.S. Dollars and have a minimum of \$50 million under management or a twelve (12) month track record of active performance.
- **HFR Equity Hedge Index** is an index of Investment Managers who maintain positions both long and short in primarily equity and equity derivative securities. Strategies can be broadly diversified or narrowly focused on specific sectors and can range broadly in terms of levels of net exposure, leverage employed, holding period, concentrations of market capitalizations and valuation ranges of typical portfolios. EH managers would typically maintain at least 50% exposure to, and may in some cases be entirely invested in, equities, both long and short. Constituent funds report monthly net of all fees performance in US Dollar and have a minimum of \$50 Million under management or \$10 Million under management and a twelve (12) month track record of active performance.

Disclosures – Index & Benchmark Definitions

- **HFRI Event Driven Index** is an index of Investment Managers who maintain positions in companies currently or prospectively involved in corporate transactions of a wide variety including but not limited to mergers, restructurings, financial distress, tender offers, shareholder buybacks, debt exchanges, security issuance or other capital structure adjustments. Constituent funds report monthly net of all fees performance in US Dollar and have a minimum of \$50 Million under management or \$10 Million under management and a twelve (12) month track record of active performance
- **HFRI Macro Index** is an index of investment Managers which trade a broad range of strategies in which the investment process is predicated on movements in underlying economic variables and the impact these have on equity, fixed income, hard currency and commodity markets. Managers employ a variety of techniques, both discretionary and systematic analysis, combinations of top down and bottom up theses, quantitative and fundamental approaches and long and short term holding periods. Constituent funds report monthly net of all fees performance in US Dollar and have a minimum of \$50 Million under management or \$10 Million under management and a twelve (12) month track record of active performance.
- **HFRI Relative Value Index** is an index of Investment Managers who maintain positions in which the investment thesis is predicated on realization of a valuation discrepancy in the relationship between multiple securities. Managers employ a variety of fundamental and quantitative techniques to establish investment theses, and security types range broadly across equity, fixed income, derivative or other security types. Constituent funds report monthly net of all fees performance in US Dollar and have a minimum of \$50 Million under management or \$10 Million under management and a twelve (12) month track record of active performance.

- **U.S. Dollar Index** measures the value of the dollar relative to a basket of U.S. trade partners' currencies. It is a weighted geometric mean of the dollar's value relative to other currencies.

Additional Information

- Equity sector returns are calculated by S&P, Russell, and MSCI for domestic and international markets, respectively. S&P and MSCI sector definitions correspond to the GICS® classification (Global Industry Classification System); Russell uses its own sector and industry classifications.
- MSCI country indices are free float-adjusted market capitalization indices that are designed to measure equity market performance of approximately 85% of the market capitalization in each specific country.
- Currency returns are calculated using FactSet's historical spot rates and are calculated using the U.S. dollar as the base currency.
